in this exciting book michel maffesoli argues that the conventional approaches to understanding solidarity and society are deeply flawed he contends that mass culture has disintegrated and that today social existence is conducted through fragmented tribal groupings organized around the catchwords brand names and sound bites of consumer culture the book provides a rich backcloth against which to consider the rise of identity politics and the proliferation of lifestyle cultures

god created man in his own image and the profound implications of this assertion are the subject of this book drawing on philosophy theology science scripture and art cardinal schnborn reflects on man as the greatest of gods creatures and on the christian understanding of his incomparable dignity that flows from this truth according to the christian faith all the works of god converge toward man and find their goal in him the world was made for man and man was made for god this anthropocentrism resounds like good news at a time when many find it hard to believe in gods special and personal providence for man it is good news indeed that man has worth and his life has meaning because god bears an infinite love for him a love which is the very origin of creation and is the reason for the work of redemption among the topics cardinal schonborn addresses are christ the loveliest of men the exaltation of man the basis of mans dignity faith in art god with a human face

this volume recording the 10th international symposium honoring noted french mathematical physicist jean pierre vigier surveys and continues to develop unified field mechanics ufm from the perspective of multiverse cosmology and topological field theory ufm represents a developing paradigm shift with many new parameters extending the standard model to a 3rd regime of natural science beyond quantum mechanics ufm is now experimentally testable thus putatively able to demonstrate the existence of large scale

additional dimensionality lsxd test for qed violating phenomena and surmount the quantum uncertainty principle leading to a new age of discovery paling all prior ages in the historical progression classical mechanics 3d to quantum mechanics 4d and now to the birth of the 3rd regime of ufm in additional dimensionality correlating with m theory many still consider the planck scale as the basement of reality this could only be considered true under the limitations of the standard model as we methodically enter the new regime a profound understanding of the multiverse and additional dimensionality beckons

challenging societal beliefs this volume rethinks african and world history from an afrocentric perspective

a new form of protophysics discerns clues to a deeper form of reality it lies before after beyond and within the more familiar universe which is described by mainstream physics tractatus is a philosophic approach it tries to give the preliminary outlines for a corresponding philosophy in a new key it delineates an infinite megaverse which seems weird at first sight and comforting at the same time seemingly incompatible realms of experience such as the structure of the megaverse the frames for unfolding and evolution the role of cognition and emotion in the universe the universality of love the reality of prayer and god the roots of logic and logos fall into place they appear to join in a harmonious whole the new philosophy relies on biperspectivism as the deepest structure in the megaverse and in the human mind biperspectivism has many forms and names energy vs information is one of them schopenhauer s wille und vorstellung is but an echo of it all in the view of this philosophy a new physics spontaneously begets a new metaphysics
