this book explores the role and implications of responsibility for anthropology asking how responsibility is recognised and invoked in the world what relations it draws upon and how it comes to define notions of the person institutional practices ways of knowing and modes of evaluation the category of responsibility has a long genealogy within the discipline of anthropology and it surfaces in contemporary debates as well as in anthropologists collaboration with other disciplines including when anthropology is applied in fields such as development medicine and humanitarian response as a category that unsettles challenges and critically engages with political ethical and epistemological questions responsibility is central to anthropological theory ethnographic practice collaborative research and applied engagement with chapters focused on a variety of cultural contexts this volume considers how anthropology can contribute to a better understanding of responsibility including the responsibility of anthropology and the responsibility of anthropologists to specific others

in a path breaking series of essays the contributors to this collection explore the development of anthropological research in asia the volume includes writings on japan china taiwan korea malaysia and the philippines

though archaeologists have long acknowledged the work of social anthropologists anthropologists have been much less eager to repay the compliment this volume argues that the time has come to recognise the insights archaeological approaches can bring to anthropology archaeology s rigorous approach to evidence and material culture its ability to develop flexible research methodologies its readiness to work with large scale models of comparative social change and to embrace the latest technology all means that it can offer valuable methods that can enrich and enhance current anthropological thinking cross disciplinary and international in scope this exciting volume draws together cutting edge essays on the relationship between the two disciplines arguing for greater collaboration and pointing to new concepts and approaches for anthropology with contributions from leading scholars this book will be essential reading for students and scholars of archaeology anthropology and related disciplines

study the science of all of us anthropology is the organized study of what makes humans human it takes an objective step back to view homo sapiens as a species and ask questions like given our common characteristics why aren t all of us exactly the same why do people across the world have variable skin and hair color and so many inventive ways to say hello and how can knowing the reasons behind our differences as well as our similarities teach us useful lessons for the future the updated edition of anthropology for dummies gives you a panoramic view of the fascinating fieldwork and theory that seeks to answer these questions and helps you view the human world through impartial anthropological eyes keeping the jargon to a minimum anthropology for dummies explores the four main subdivisions of the discipline from the adventurous indiana jones territory of archaeology and the hands on biological insights provided by our physical nature to the studious book cracking brainwork of cultural and linguistic investigation along the way you ll journey deep into our prehistory where we begin to differentiate ourselves from our primate relatives and then fast forward into the possibilities of centuries yet to come explore the history of anthropology and apply its methods get a deep scientific take on contemporary debates such as identity excavate the human past through new fossil discoveries peer into humanity s future in space whether you re studying anthropology for school or just want to know more about what makes us humans who we are this is the perfect introduction to humanity s past and present and a clue to what we need to build a better future

using the cross cultural evolutionary and multi disciplinary perspectives that are unique to anthropology this text examines contemporary civilization s most pressing problems and generates ideas for solutions and hope for the future

the great anthropologist s classic treatise on race and culture one of the most influential books of the century now available in a value priced edition introduction by ruth bunzel

this easy reading yet substantive book provides an introduction to sociocultural anthropology across a broad range of cultures including those of today's world its simple and engaging style is designed to spark consideration and discussion the book covers the major issues in the field while emphasizing the relevance of the subject through up to date materials and discussions of events and people in the contemporary world it presents the variety of ways in which humans live and provides wide coverage of the cultures humankind within their appropriate time and space the third edition of a little anthropology has been revised to reflect changes both in anthropology and in the world these revisions include an expanded discussion of tourism and two new summary case studies in the chapter on the developing world among others a vital resource for any reader or professional who is seeking a contemporary cross cultural overview

anthropology and modern life first published in 1929 addresses itself to an immensely broad field with clarity introducing anthropology as a unique and coherent discipline and demonstrating its importance in the understanding of socio cultural change throughout history the author covers varied and diverse areas of study ethnicity including a lengthy discussion of the concepts of race and nationality criminology and the importance of hereditary and environmental factors in producing criminals education and the associated issues of gender class and what would now be called brainwashing and also the comparison between modern and primitive cultures taking note of the development of socio political institutions such as marriage and property

this collection offers the fruits of a stimulating workshop that sought to bridge the fraught relationship which sometimes continues between anthropologists and indigenous native aboriginal scholars despite areas of overlapping interest participants from around the world share their views and opinions on subjects ranging from ideas for reconciliation the question of what might constitute a universal science indigenous heritage postcolonial museology the boundaries of the term indigeneity different senses as ways of knowing and the very issue of writing as a method of dissemination that divides and excludes readers from different backgrounds this book represents a landmark step in the process of replacing bridges with more equal patterns of intercultural cooperation and communication

this volume is intended as a critique of anthropology's epistemological and ontological assumptions and a demonstration of the value added by an expanded set of parameters for the field the book's core argument is that whilst ethnographers have allowed their own perspectives to be positively influenced by the perspectives of their informants until recently anthropology has done little in the way of adopting these other viewpoints as critical tools for analysis the book is essential reading for scholars of the anthropology of religion as well as other philosophically oriented social scientists and theologians

this book presents the results of an experiment in interdisciplinary collaboration to clarify theories of morality and anthropology and philosophy showing how each may be enriched by borrowing from the other pooling the resources and methods of their respective fields anthropology and philosophy may and Abraham Edel examine the wide range of moral differences in the world to establish coordinates for the more systematic mapping of particular moralities to explore more explicitly the relations of morality to cultural patterns and social processes and to see how philosophic issues of ethical theory become refined and reformulated when their cultural content is made manifest the book contains an implicit suggestion that the anthropologist should focus on morality as an independent area of study and that the philosopher should stop treating morality in isolation anthropology tends to include morality as an incidental part of other inquiries philosophy on the other hand tends to cut morality off from the framework of psychological and cultural processes the result is a kind of deadlock in ethical theory the Edels observe that to develop a working concept of morality at least as well developed as that

furnished for religion anthropology can benefit from philosophic methods of analyzing concepts and from philosophical ways of conceptualizing problems of ethical theory on the other hand philosophy can use the methods of anthropology to approach morality in more meaningful terms this study is not addressed only to professionals its aim rather is to provide an orientation to morality itself in a world in which human problems are becoming extremely complex and have to be confronted directly as moral
